Certificate of Participation

To whom it may concern,

This is to certify that **Germaine Ishimwe Umuhoza** participated in the SIMcubator Rwanda 2026, a social impact startup incubator hosted at Norrsken House, Kigali.

Germaine was selected as part of one of the 14 startup teams from a pool of over 100 applications and participated in the program with the venture ABE NEST. The program consisted of a one-week intensive bootcamp (January 26th–30th, 2026), followed by a two-month mentorship phase and a final Pitch Day on March 27th, 2026.

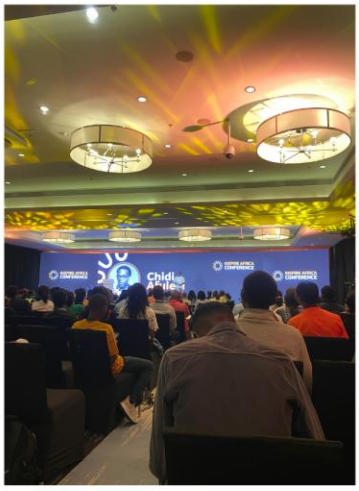

During the program, participants worked on venture development, business model refinement, and investor readiness in close collaboration with mentors and industry experts.

The program concluded with a Pitch Day, where participating teams presented their ventures to a jury and competed for funding and additional support, including access to the BCG Startup Unlock Program.

We congratulate Germaine Ishimwe Umuhoza on this achievement.
Given on April 10, 2026
